Question:

As per the requirements of the Terms of reference (p.6.1.1. Key experts) “Key experts are not required. There is no specific evaluation criterion for the key experts but the assessment of team composition, allocation of responsibilities and expert`s inputs and outputs for proper implementation of the contract tasks is part of the assessment of the strategy”.

*Could you please confirm that the description of the team composition (types of experts), allocation of responsibilities and experts inputs and outputs are sufficient for the application stage, and **no names of experts are to be mentioned** at this stage in the Organisation and Methodology?*

Answer:

As per the requirements set in the Terms of reference (ToR) under p.6.1.1, no key experts are required (respectively no names of experts, CVs and documents proving the professional experience are necessary) and therefor no specific evaluation criteria for the key experts are foreseen in the Evaluation grid for global price contracts (part C of the tender dossier). In this respect, it depends entirely on the tenderer`s vision and understanding how to present the team composition in the Organisation and Methodology (part B of the tender dossier), so as the strategy for the contract implementation to be properly assessed according to the criteria in the Evaluation grid.
